# 1. Prerequisite Item List

## Require Tool:

- RaspPi Power Adaptor/USB-C power cable
- MicroSD card USB reader
- Micro HDMI cable
- Mouse and Keyboard

## Require Software Install In Window OS:

- Install Raspberry Pi Image (<https://www.raspberrypi.com/software/>)

### Raspberry Pi Imager

Raspberry Pi Imager is the quick and easy way to install **Raspberry Pi OS** and other operating systems to a microSD card, ready to use with your Raspberry Pi.

Download and install Raspberry Pi Imager on a computer with an SD card reader. Insert the microSD card you'll use with your Raspberry Pi into the reader and run Raspberry Pi Imager.

[Download for Windows](#)

[Download for macOS](#)

[Download for Debian or Ubuntu \(x86\\_64\)](#)

To install on Raspberry Pi OS, type  
`sudo apt install rpi-imager`  
into a terminal window

- Install RealVNC Viewer  
([https://www.realvnc.com/en/connect/download/viewer/?lai\\_vid=X1y8VO3xrhJe&lai\\_sr=5-9&lai\\_sl=1](https://www.realvnc.com/en/connect/download/viewer/?lai_vid=X1y8VO3xrhJe&lai_sr=5-9&lai_sl=1))

## **Require OS:**

- Install Raspberry Pi OS (<https://www.raspberrypi.com/software/operating-systems/>)

### **Raspberry Pi OS (Legacy) Full**

A port of Debian Bookworm with security updates,  
desktop environment and recommended applications

|                |               |
|----------------|---------------|
| Release date   | 1 Oct 2025    |
| System         | 64-bit        |
| Kernel version | 6.12          |
| Debian version | 12 (bookworm) |
| Size           | 3,145 MB      |

► SHA256 file integrity hash

## 2. Initiate Setup

- Install the image into SD card from Windows OS PC

- Go To "Preferences" >> "Raspberry Pi Configuration"
  - "Interfaces" >> Turn On All Interfaces.

- "Localisation" >> Locale, Timezone, Wireless LAN Country. (SG,Singapore)

- For General Update Require: (MUST)  
`sudo apt install apache2 -y`  
`sudo apt-get upgrade`  
`sudo apt update`  
`sudo apt full-upgrade`  
`sudo reboot`
- Install Development IDE  
`sudo apt install code`  
`sudo apt update`
- Python Environment Setup: (OPTIONAL)  
`sudo apt install python3 idle3`  
`sudo apt install python3-pip`  
`sudo apt-get install python3-spidev`  
`sudo apt-get install python3-gpiozero`  
`sudo apt install python3-flask`
- For GPIO Lib Setup: (MUST)  
`sudo apt install libgpiod-dev`
- For DQGHATS Setup: (MUST)  
`sudo apt install git -y`  
`cd ~`  
`git clone https://github.com/mccdaq/daqhats.git`  
`cd ~/daqhats`  
`sudo ./install.sh`

(For Python environment)

```
cd /
```

```
sudo python3 -m venv "pyvenv"
```

```
sudo chmod 777 "pyvenv"
```

```
sudo /pyvenv/bin/pip install daqhats
```

```
sudo /pyvenv/bin/pip install dash
```

```
cd ~/daqhats
```

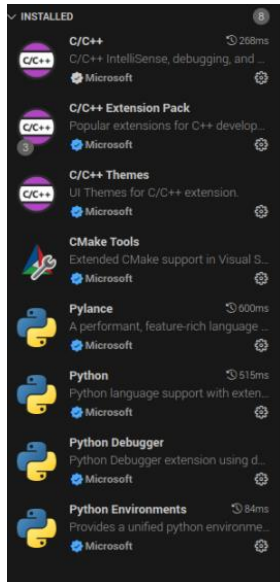

```
sudo /pyvenv/bin/python setup.py install
```

```
sh -c '/pyvenv/bin/python ~/daqhats/examples/python/mcc118/web_server/web_server.py'
```

<http://localhost:8080/>

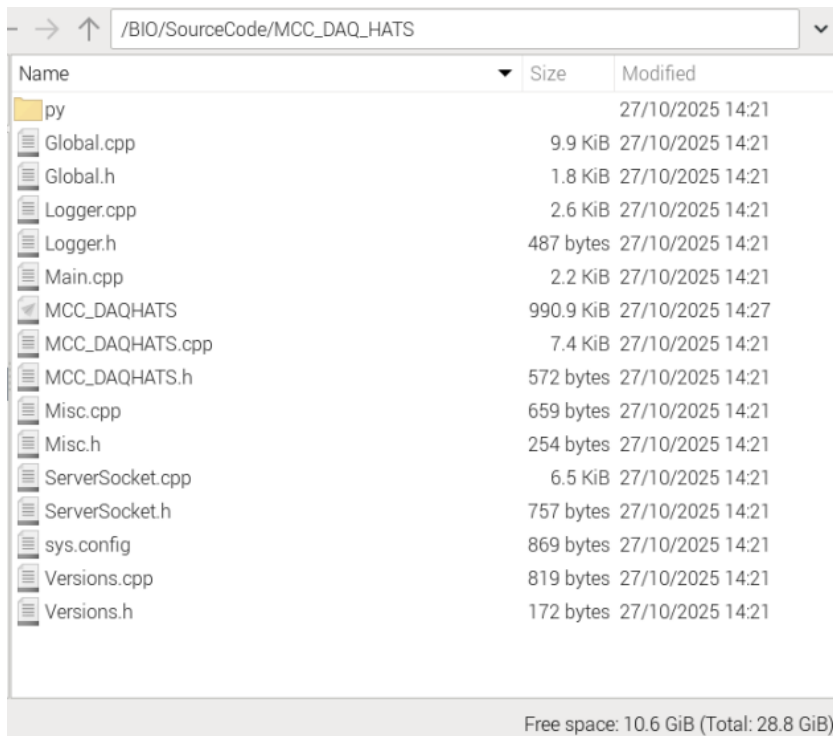

### 3. VSCODE

VSCODE Extension Require:

Source Code:

/BIO/SourceCode/MCC\_DAQ\_HATS

## Release:

/BIO/Program/MCC\_DAQ\_HATS

| /BIO/Program/MCC_DAQ_HATS |           |                  |  |  |
|---------------------------|-----------|------------------|--|--|
| Name                      | Size      | Modified         |  |  |
| log                       |           | 27/10/2025 14:44 |  |  |
| MCC_DAQHATS               | 990.9 KiB | 27/10/2025 14:27 |  |  |
| sys.config                | 869 bytes | 27/10/2025 14:21 |  |  |

## Logs:

/BIO/Program/MCC\_DAQ\_HATS/log

| /BIO/Program/MCC_DAQ_HATS/log |           |                  |  |  |
|-------------------------------|-----------|------------------|--|--|
| Name                          | Size      | Modified         |  |  |
| log_20251027_00.txt           | 125.1 KiB | 27/10/2025 15:02 |  |  |

## 4. Service List

The List as below:

- rc-local.service
- pyweb.service
- nmbd.service
- smbd.service

```
pi@raspberrypi:~$ systemctl list-units --type=service --state=running
```

| UNIT                          | LOAD   | ACTIVE | SUB     | DESCRIPTION                                    |
|-------------------------------|--------|--------|---------|--|
| accounts-daemon.service       | loaded | active | running | Accounts Service                               |
| apache2.service               | loaded | active | running | The Apache HTTP Server                         |
| avahi-daemon.service          | loaded | active | running | Avahi mDNS/DNS-SD Stack                        |
| bluetooth.service             | loaded | active | running | Bluetooth service                              |
| cron.service                  | loaded | active | running | Regular background program processing daemon   |
| cups-browsed.service          | loaded | active | running | Make remote CUPS printers available locally    |
| cups.service                  | loaded | active | running | CUPS Scheduler                                 |
| dbus.service                  | loaded | active | running | D-Bus System Message Bus                       |
| getty@tty1.service            | loaded | active | running | Getty on tty1                                  |
| lightdm.service               | loaded | active | running | Light Display Manager                          |
| ModemManager.service          | loaded | active | running | Modem Manager                                  |
| NetworkManager.service        | loaded | active | running | Network Manager                                |
| nmbd.service                  | loaded | active | running | Samba NMB Daemon                               |
| polkit.service                | loaded | active | running | Authorization Manager                          |
| pyweb.service                 | loaded | active | running | my server                                      |
| rc-local.service              | loaded | active | running | /etc/rc.local Compatibility                    |
| rtkit-daemon.service          | loaded | active | running | RealtimeKit Scheduling Policy Service          |
| serial-getty@ttyAMA10.service | loaded | active | running | Serial Getty on ttyAMA10                       |
| smbd.service                  | loaded | active | running | Samba SMB Daemon                               |
| ssh.service                   | loaded | active | running | OpenBSD Secure Shell server                    |
| systemd-journald.service      | loaded | active | running | Journal Service                                |
| systemd-logind.service        | loaded | active | running | User Login Management                          |
| systemd-timesyncd.service     | loaded | active | running | Network Time Synchronization                   |
| systemd-udevd.service         | loaded | active | running | Rule-based Manager for Device Events and Files |
| triggerhappy.service          | loaded | active | running | triggerhappy global hotkey daemon              |
| udisks2.service               | loaded | active | running | Disk Manager                                   |
| user@1000.service             | loaded | active | running | User Manager for UID 1000                      |
| wayvnc-control.service        | loaded | active | running | VNC Control Service                            |
| wayvnc.service                | loaded | active | running | VNC Server                                     |
| wpa_supplicant.service        | loaded | active | running | WPA supplicant                                 |

LOAD = Reflects whether the unit definition was properly loaded.  
ACTIVE = The high-level unit activation state, i.e. generalization of SUB.  
SUB = The low-level unit activation state, values depend on unit type.  
30 loaded units listed.
